1 Introduction

The annual National Deaf-Blind Child Count is the world's first and longest-running count of children who are deaf-blind. Begun in 1986 on behalf of the U.S. Department of Education, it represents a collaborative effort between the National Center on Deaf-Blindness (NCDB) and state deaf-blind projects throughout the country, including those in the Pacific Trust territories, the Virgin Islands, and Puerto Rico.

The annual child count helps identify state and national technical assistance needs for children who are deaf-blind, their families, and the providers and systems that serve them.

1.1 Data Collection

Each year, state deaf-blind projects capture a point-in-time count of the number of children eligible for project services on December 1 as well as information about the special education services those children receive under the Individuals with Disabilities Education Act (IDEA), Part B or C.

- IDEA Part C covers early intervention for infants and toddlers with disabilities.
- IDEA Part B covers children and youth ages 3–21.

The official count used in this report is the number of children eligible for state deaf-blind project services on December 1.

NCDB provides technical assistance to the state projects to help them conduct their counts and compiles the data into this national report.

1.2 The Importance of an Accurate Count

The number of children identified as deaf-blind in the National Deaf-Blind Child Count and the total included in the IDEA Part B child count are often vastly different. In 2021, 9,809 children and youth were identified with deaf-blindness (ages 3–21) according to the National Deaf-Blind Child Count, while only 1,770 were identified in IDEA's 2020–2021 school year Part B count ([U.S. Department of Education, 2021](#)).

This discrepancy occurs because the National Deaf-Blind Child Count includes children whose sole disability is deaf-blindness as well as those with additional disabilities. In contrast, [IDEA Part B reporting regulations](#) instruct states to count children only when a child has deafness and blindness and no other disabilities.

Over the years, under-identifying or under-counting children who are deaf-blind has been a consistent problem. Accurately identifying all children who are deaf-blind is essential so they can begin receiving specialized services and supports that are critical to early development and learning ([Herbster, 2015](#); [Müller, 2006](#); [Purvis & Schalock, 2014](#)).

1.3 Overview of Deaf-Blindness

Deaf-blindness is defined in **IDEA regulations** as

Concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational needs that they cannot be accommodated in special education programs solely for children with deafness or children with blindness.

This is a common definition of deaf-blindness used by state deaf-blind projects, but they have the discretion to establish additional criteria for their services.

The population of children who are deaf-blind is one of the smallest yet most diverse groups of children receiving early intervention and special education services. In addition to deaf-blindness, many children also have physical or cognitive disabilities, complex medical needs, and/or behavior challenges.

1.4 Understanding the Report Data

The National Deaf-Blind Child Count includes data to help inform state and national technical assistance services and initiatives. This includes information on

- Gender
- Etiology
- Documented Vision Loss
- Cortical Visual Impairment
- Documented Hearing Loss
- Central Auditory Processing Disorder
- Auditory Neuropathy
- Cochlear Implants
- Other Impairments or Conditions
- Living Setting
- Intervener Services
- Use of Corrective Lenses, Listening Devices, and/or Assistive Technology
- Primary Language in the Home (Optional Reporting)

The report also includes the following data elements, which are consistent with those used in IDEA Part B and C child counts regarding all children receiving special education services:

- Race/Ethnicity
- Part B and C Category Codes
- Early Intervention Setting (Birth–2)
- Educational Environment (3–5 and 6–21)
- Participation in Statewide Assessments
- Part C Exiting Status (Birth–2)
- Part B Exiting Status (3–21)

1.5 Data Considerations

The method used to calculate the December 1 count total was changed in 2021. Previously, it was based on the number of children who were eligible for state deaf-blind project services *and* receiving IDEA Part B or C services on December 1. Now, it is solely the number of children who were eligible for state deaf-blind project services on December 1. The criteria for receiving IDEA services was removed because it excluded some children from the report, such as those who were on 504 Plans or who had exited school but were not yet 21 and were still receiving transition services. Due to this change, trend data cannot be generated using totals from past reports. Contact NCDB for assistance obtaining data for trend reports or analysis.

In 2020, modifications were made to several child count reporting elements (e.g., gender, educational settings). A clear understanding of these changes is important for anyone doing analyses that involve more than one year of data. Notes on the 2020 changes are included in relevant sections of this report. For additional information, see

- [2020 National Deaf-Blind Child Count Revisions](#)
- [Deaf-Blind Child Count Change Log \(2007–2023\)](#)

2 Overall Population Demographics

On December 1, 2021, a total of 10,441 children were eligible to receive state deaf-blind project services. This is a decrease of 76 from the 2020 total of 10,517. The number of children served by state deaf-blind projects at any time during the year decreased from 11,407 to 11,330.

Ages

The 10,441 total includes

- 527 infants and toddlers (birth–2)
- 9809 children and youth (3–21)
- 74 (age 22) from states that provide services through the end of the school year in which students turn 22 years of age
- 31 (ages 23–26) from Michigan, which provides services up to age 26 for students who meet state eligibility criteria, and other states that have allowed compensatory services

Race/Ethnicity

- White—53%
- Latino or Hispanic—20%
- Black or African American—14%
- Other races (Asian, American Indian, Native Hawaiian, Two or more)—10%
- Unknown or missing—3%

Gender

- Male—53%
- Female—46%
- Other, unknown, or missing—1%

2.1 State Child Count Totals

State	Total number served by state during year	Number on December 1 count
Alabama	361	270
Alaska	25	24
Arizona	240	236
Arkansas	247	238
California	1,061	995
Colorado	175	155
Connecticut	71	65
Delaware	61	58
District of Columbia	24	24
Florida	648	614
Georgia	342	321
Hawaii	52	52
Idaho	48	48
Illinois	317	274
Indiana	253	234
Iowa	110	110
Kansas	134	134
Kentucky	155	138
Louisiana	108	100
Maine	65	59
Maryland	187	187
Massachusetts	244	231
Michigan	327	314
Minnesota	379	362
Mississippi	87	84

State	Total number served by state during year	Number on December 1 count
Missouri	272	228
Montana	39	37
Nebraska	104	104
Nevada	130	118
New Hampshire	88	82
New Jersey	180	167
New Mexico	151	151
New York	458	458
North Carolina	294	294
North Dakota	44	37
Ohio	361	348
Oklahoma	176	167
Oregon	101	99
Pacific Basin	64	64
Pennsylvania	633	532
Puerto Rico	38	36
Rhode Island	48	48
South Carolina	150	146
South Dakota	34	34
Tennessee	314	299
Texas	925	781
Utah	141	129
Vermont	36	34
Virgin Islands	21	21
Virginia	183	156
Washington	315	295

State	Total number served by state during year	Number on December 1 count
West Virginia	96	64
Wisconsin	167	139
Wyoming	46	46
Total	11,330	10,441

Note: Some states continue to provide services through the end of the school year in which the individual turns 22 years old. Michigan provides services to age 26.

2.2 Age of Child

State	0–2	3–5	6–11	12–17	18–21	Over 21	Total

Note: 2020 was the first year the option of reporting Primary Language in the Home was available.

3 Documented Hearing and Vision Loss

The range and types of hearing and vision loss illustrate the diversity of the deaf-blind population. Only about 1% of children have profound hearing loss and total blindness. The other 99% have some residual hearing or vision.

3.1 Summary of Vision Loss Data

- Just under 79% (8,286) of children were identified as having low vision, being legally blind, or having documented functional vision loss
 - Low vision (34%)
 - Legally blind(21%)
 - Documented functional vision loss (24%)
- 4% were totally blind
- 30% had cortical visual impairment

3.2 Summary of Hearing Loss Data

- Profound hearing loss was the most common primary classification of hearing impairment reported, occurring in 21% of children
- 13% had mild hearing loss
- 19% had moderate hearing loss
- 16% had moderately severe hearing loss
- 9% had severe hearing loss
- 13% had documented functional hearing loss
- 6% were identified as needing further hearing tests

Relatively few children were identified as having central auditory processing disorder (401) or auditory neuropathy (539). These numbers represent 4% and 5% of the population respectively.

3.3 Use of Corrective and Assistive Devices

There has been a significant increase over the past five years in the percentage of children with corrective lenses (41.6% to 46.9%) and assistive listening devices (48.1% to 52.9%).

The number of children identified as having cochlear implants was 1,377 (13%) in 2021. The percentage of children ages birth through age 2 with cochlear implants decreased from 8% in 2020 to 7% in 2021. The percentage for children ages 3 through 5 grew from 10% in 2020 to 13% in 2021. The percentage of children ages 6 through 21 increased by 2%, from 39% to 41%.

The percentage of children who use assistive technology was 45% (4,665). Of these, 49% were children with four or more additional disabilities, while only 8% were children with no additional disabilities.

3.4 Primary Classification of Vision Impairment

4 Etiologies

There are many causes of deaf-blindness, and each has unique characteristics and challenges. More than 70 causes were identified in 2021. Some are more prevalent, such as CHARGE Syndrome, Down Syndrome, Usher Syndrome, and Congenital Cytomegalovirus (CMV), with 100 or more cases of each reported every year. Annually, about 20 identified causes have fewer than 10 reported cases. Some of these, such as Hunter Syndrome (MPS II) and Cogan Syndrome, are exceedingly rare with just one or two cases reported annually.

Here are some highlights from the data:

- The number of children with hereditary syndromes and disorders was 5,039 in 2021, accounting for 48% of all etiologies.
- The number of children with CHARGE syndrome was 1,054.
- The prevalence of Stickler syndrome and Cornelia de Lange Syndrome increased but are still relatively rare.
- Prenatal congenital complications accounted for 14% and postnatal non-congenital complications for 11%.
- Congenital Rubella Syndrome (CRS), which has long been associated with deaf-blindness, is no longer common in the U.S.; 30 children had CRS, which is down from 83 in 2010. Of these, 27% are younger than 10, and the youngest age is 2.
- The etiology was undetermined in 1,852.

4.1 Primary Identified Etiology

4.1.1 Hereditary Syndromes/Disorders

Conditions	Total
CHARGE Syndrome	1,054
Usher Syndrome (I,II,III)	442

5 Additional Disabilities

In 2021, approximately 87% of children were identified as having one or more additional disabilities, most commonly speech/language impairments (76%), cognitive impairments (64%), and orthopedic/physical impairments (58%). Approximately half (53%) were identified as having complex healthcare needs.

The number with multiple additional disabilities has increased over time. In 2005, just 13% had four or more additional disabilities. In 2021, that number rose to 43%. Thirteen percent had no additional disabilities.

6 Part C Information

Under IDEA, eligibility for Part C services is based on how each state defines an infant or toddler with a disability, which must include those with a developmental delay and those “with diagnosed physical or mental conditions with a high probability of resulting in developmental delay” (**Frank Porter Graham Child Development Institute, 2021**).

Most children who are deaf-blind were reported under the Part C Developmental Delay category. Some state Part C programs include the category “At-Risk.” About 16% of children in the deaf-blind count were reported in this category. Almost all Part C intervention services were provided in the home.

6.1 IDEA Part C Reported Category

7 Part B Information

This section includes the following data about children receiving IDEA Part B Services:

- Disability category
- Educational environment
- State assessments

7.1 Disability Category

Disability category refers to the primary disability listed on the child's Individualized Education Program (IEP) and/or service plan. The most common disability categories in 2021 were:

- Multiple Disabilities (33%)
- Deaf-Blindness (17%)
- Hearing Impairment (9%)
- Other Health Impairment (7%)
- Visual Impairment (4%)
- Intellectual Disability (6%)

As noted in the introduction to this report, there is a large difference between the number of children identified as deaf-blind in the National Deaf-Blind Child Count and the number identified in the IDEA Part B count. The fact that only 17% were identified as having deaf-blindness in the 2021 IDEA Part B count underscores this discrepancy, which occurs because IDEA Part B reporting regulations instruct states to count children only when a child has deafness and blindness and no other disabilities.

The difference between the two counts is important because approximately 87% of the children in the National Deaf-Blind Child Count have one or more additional disabilities. It is common for children with deaf-blindness to be listed under a different disability category on the IDEA Part B child count depending on the severity of the additional disabilities they experience.

7.2 Educational Environment

The percentage of young children, aged 3 to 5, educated in regular early childhood education settings for some portion of the day was 42% in 2021. The percentage of children aged 6 to 21 being served at least a portion of the day in a regular classroom was 62%.

7.3 IDEA Part B Reported Category (Table 1 of 2)

8 Educational Supports

Interveners provide access to information, the environment, communication, and conceptual learning for children who are deaf-blind. Growth in intervener services has been decreasing. The number of children receiving intervener services diminished from 812 (8%) in 2020 to 779 (7%) in 2021.

Note: Not applicable may mean a child is too young for an intervener or a state does not recognize the role of interveners.

9 Living Setting

Most children live at home with their parents or extended family (91%). Small numbers live with foster parents, in state or private residential facilities, pediatric nursing homes, and group homes or apartments.

10 Exiting Information

Exiting status refers to whether a child was receiving Part B or Part C services at the beginning of the reporting period but left sometime before the end of the 12-month reporting period and, if so, for what reason. It also identifies if a child who has left Part C is eligible for Part B services. These tables show the cumulative total, rather than the December 1 total because children may exit anytime during the reporting period.

Most children who exited Part C were eligible for Part B (72%). The remaining were withdrawn by parents (16%), were not able to be contacted (3%), had an undetermined Part B eligibility status (2%), moved out of state (4%), completed their IFSP prior to the maximum age (1%), or died (1%).

Children exit Part B for a number of reasons. For example, they graduate, age out, transfer to regular education, drop out, or die.

10.1 Part C Exiting Status (Table 1 of 2)

State	In Part C EI Program	Completion of IFSP Prior to Max Age	Eligible for Part B	Not Eligible for Part B	Part B Eligibility Not Determined	Deceased
